REMARKS

This renewed petition is in response to the Patent Office's dismissal of the Request for Certificate of Correction filed November 20, 2009. Please note that the Decision was mailed to the wrong address; please verify the correct correspondence address for this matter is that which is recited at the conclusion of this paper.

The Decision stated that our request for Certificate of Correction was treated as a petition under 37 CFR § 1.78(a)(3), seeking to add a claim for priority under 35 U.S.C. § 120. We believe that treating our request in this manner was in error, as further described below. As such, we respectfully request that the \$1,410 surcharge be refunded to Deposit Account No. 06-1135.

The Application Data Sheet is Controlling, Thereby Removing the Need to Petition for Correction of Priority

Our request for Certificate of Correction filed on November 20, 2009 did not include the petition required under 37 CFR § 1.78(a)(3) because no additional claims of priority were substantively added by our Certificate of Correction. The application for this issued patent was filed on August 5, 2003, along with an Application Data Sheet. The related applications were specifically claimed in the Application Data Sheet filed on August 5, 2003 (attached) in accordance with 37 CFR § 1.76(b)(5), which constitutes the specific reference required by 35 U.S.C. § 120 and 37 CFR § 1.78(a)(2). The requested Certificate of Correction listing these priority claims on the face of the patent was to correct an error on the part of the PTO under 37 CFR § 1.322. These priority claims, correctly claimed in the Application Data Sheet, should have been listed on the face of the patent. Where the priority claims in the Application Data Sheet were inconsistent with the priority claims in the specification, according to 37 CFR § 1.76(d)(2), the information in the Application Data Sheet governs.

In the Certificate of Correction, we also corrected the priority claims as listed in the specification in order for them to correspond to the correct claims of priority as recited in the Application Data Sheet. As this error was due to applicant's mistake, this request falls under 37 CFR § 1.323.

As previously stated, the priority claims were correctly made and established on the filing date. Thus, the requested Certificate of Correction does not add any new priority claims

Issued March 6, 2007  
REQUEST FOR CERTIFICATE OF CORRECTION OF PATENT

requiring the \$1,410 surcharge. The request is for the PTO correct its mistake in not listing these claims on the face of the patent.

#### The Priority Claim is Correct

The Decision stated that the amendment presented in the Certificate of Correction was unacceptable because “application 09/683,491 [sic] became abandoned on May 4, 2003....” (Emphasis added.) This may very well be true; however, we did not claim priority to that application. Rather, our priority claim in the Certificate of Correction is to “application No. 09/683,481 [“the ‘481 application”] filed Jan 5, 2002, now abandoned....” (Emphasis added.) The ‘481 application was abandoned on October 1, 2003. The filing date for this patent for which we requested correction was August 5, 2003. Thus, these applications were “co-pending at the time the present application was filed” and are acceptable. The claim of priority to the ‘481 application was recited in the Application Data Sheet filed with the application that matured into the patent at issue in this renewed petition.

The Decision further stated that “09/532,350 [“the ‘350 application”] does not claim the benefit of 60/175,825, 60/160,125 and 60/125,531.” We respectfully disagree with this assessment. Each of these provisional applications is listed on both the face of U.S. Patent No. 6,338,082 B1 (“the ‘082 patent”), which is the patent that issued from the ‘350 application. Furthermore, the ‘350 application claims the benefit of the above listed provisional applications in the first paragraph of the specification, as recited in Col. 1, Lines 5-26 of the ‘082 patent.

#### Conclusion

Attached hereto is Form PTO/SB/44 incorporating the requested changes. This is the same form that was submitted in the prior Request for Certificate of Correction.

As the requested correction to the priority claim does not add any new claims of priority requiring a petition under 37 CFR § 1.78(a)(3), please refund our deposit account, Deposit
